Office Action Summary

Art Unit: 1763

15. Claims 1-4 are generic to a plurality of disclosed patentably distinct species comprising the following:

- 1.) monoalkyl-trialkoxysilane and tetraalkoxysilane reacted together to form insulator (i.e.-claim 5);
- 2) tetraalkoxysilane, monoalkylsilane, and dialkoxysilane reacted together to form insulator (i.e.-claim 6);
- 3.) monoalkyl-trialkyl-trialkoxysilane reacted to form insulative condensate of ladder type (i.e.-claim 7); and
- 4.) alkylene glycol-dialkyl ether and trialkoxysilane reacted together to form insulator (i.e.-claim 8)

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

A telephone call was made to attorney Curtis Hamre on 10-5-01' to request an oral election to the above restriction requirement, but did not result in an election being made.

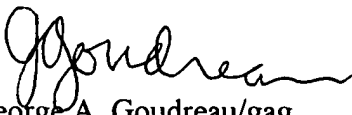

Art Unit: 1763

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

16. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Examiner George A. Goudreau whose telephone number is (703) -308-1915. The examiner can normally be reached on Monday through Friday from 9:30 to 6:00.
